DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Gnuse on 06/19/2006.

1. The application has been amended as follows:

In the claims:

a. Claim 5 has been canceled.

Allowable Subject Matter

2. Claims 1-4 and 6-11 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art made of record (U.S. Pat No(s) 61376755; 4,583,209) teaches as for claim 1 a circuit for tracking error signal detection on an optical storage medium, the optical storage

medium detecting the reflective beams form which through a plurality of photo detectors to generate a plurality of signals, thereby generating a first summing signal and a second summing signal in order to obtain a tracking error signal, the circuit comprising:

a plurality of digitizers, for outputting the first summing signal and the second summing signal as a first digital summing signal and a second summing signal respectively, and outputting a third digital summing signal according to a third summing signal which is generated according to the first summing signal and the second summing signal;

a delayer for generating a delay signal according to the third digital summing signal; and

a plurality logic of comparators for outputting a first comparing signal after comparing the first digital summing signal, and a second comparing signal after comparing the second digital summing signal such that the tracking error signal is generated according to the first comparing signal and the second comparing signal.

The prior art made of record does not teach or fairly suggest the plurality logic of comparators outputting a first comparing signal after comparing the delay signal and the first digital summing signal, and a second comparing signal after comparing the delay signal and the second digital summing signal.

Regarding claims 6 and 9, the limitations are similar to those in claim 1 and are not taught by the references. The prior art made of record does not teach or fairly suggest the plurality of logic comparator's comparisons and outputs as further recited in claims 6 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jorge L. Ortiz-Criado whose telephone number is (571) 272-7624. The examiner can normally be reached on Mon.-Thu.(12:30 pm- 9:00 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrea L. Wellington can be reached on (571) 272-4483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
